Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-5; drawn to a method of detecting gene expression pattern, classified in class 702, subclass 19.
- II. Claims 6-9; drawn to an apparatus wherein gene expression profile is processed to provide a plurality of gene expression pattern to permit maximal separation among gene expression pattern, classified in class 702, subclass 19.
- III. Claims 10-15; drawn to a method of extracting gene expression signature based on frequency domain transformation using wavelets, classified in class 702, subclass 19.

The inventions are distinct, each from the other because:

The inventions Groups I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions directed to products and methods having different functions, different effects, and different modes of operations. The method of Group I is directed to detecting gene expression pattern. The apparatus of Group II processes a gene expression profile to result in a plurality of gene expression pattern with maximal separation among the gene expression pattern. The method of Group III utilizes wavelets to extract gene expression signature. Thus, Groups I, II, and III have different functions, different effects, and different modes of operation.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

INVENTORSHIP AMENDMENT

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. §1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
